-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. It is noted that the present application was filed under 37 CFR 1.53(b) as a divisional application. However, according to MPEP 201.06 [R-1], a divisional application is “[a] later application for an independent or distinct invention, carved out of a pending application and disclosing and claiming only subject matter disclosed in the earlier or parent application.” As described in 35 U.S.C. 121, a divisional application may result if two or more independent and distinct inventions are claimed in one application and a restriction requirement is made. The non-elected subject matter may then be made the subject of a divisional application.

In the instant case, no restriction requirement was made in parent application number 10/068,662. Thus, the present application cannot rightly be filed as a divisional.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 20 lacks antecedent basis for “a boundary portion” in line 4. It is not clear from claims 17 or 18, from which claim 20 depends, what said “boundary portion” is. Does this refer to grain boundaries? The surface or “boundary” of the magnetic layer?

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 17-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Carey et al. (US 6280813).

Carey et al. disclose a magnetic recording medium having bottom magnetic layer and a top magnetic layer (see Fig, 1, 3, 4). Figure 3 shows the Co coupling intensifying regions between the coupling layer and each of the magnetic layers. As shown in Figure 4, a recording field applied from a magnetic head within the range of $-2000 < H < 2000$ results in a recording medium having magnetic layers with anti-parallel magnetizations.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Holly Rickman whose telephone number is (571) 272-1514. The examiner can normally be reached on Monday-Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul J. Thibodeau can be reached on (571) 272-1516. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
